Paperwork Policy

Prior authorization, precertification, medication substitution, laboratory/procedure referral paperwork and laboratory recoding paperwork costs are increasing geometrically in our transitioning healthcare industry. Therefore, our paperwork policy is as follows:

- All paperwork **unrelated to a direct physician office visit** will be billed at a rate of \$100/hour of professional time.
- \$25 fee for an initial prior authorization of a single prescription
- \$75 fee for an appeal of a denied prior authorization for a single prescription

REMEMBER: every time you call your insurance company to obtain the information needed to have the services, medications, and studies you require prescribed by your physician, reduces the extra fees that will otherwise be passed on to you.

Payment for Prior Authorization Paperwork is not a guarantee of approval for requested prescriptions and/or procedures from your insurance company. Your insurance company makes the final determination regarding coverage.
